Subject: Climax Mine - need your help

Hi all,

I've been trying to locate two memos for our developing case in CO (Climax Mine).

One is a memo talking about SEASONALITY – mentioning flow can be considered seasonal even if it lasts for less than 3 months, depending on local hydrologic conditions.

The second relates to a past case at R9 and discusses CHEMICAL NEXUS, and how adverse effects from connectivity could be used to demonstrate a significant nexus.

Thanks for your help,
Hadas
